## About me

I started learning on my own, then completed three courses on the iTGid education platform. After that, I joined a mentorship program at FoxmindEd. Shortly after, I landed my first job at Admiral Studios, where I worked on small to medium-sized projects.

My primary tech stack includes React, Next.js, Redux, and Tailwind, which were used in most of my projects. I am also confident in working with Mapbox and GraphQL. I collaborated closely with designers, backend developers, and SEO specialists. Additionally, I communicated directly with clients, identified their problems, and proposed and implemented my own solutions.

During my year and a half at the company, I had the opportunity to work with clients from Great Britain, Spain, Switzerland, Finland, and other countries. I take my tasks seriously and always strive to deliver high-quality work within the agreed timeframe.

## Languages

English: Intermediate    Ukrainian: Native    russian: Native

## Skills

### Languages

FE related    HTML    CSS/SCSS    JavaScript    TypeScript    Liquid

### Technologies

UI related    Tailwind CSS    Material UI    Styled Components    shadcn/ui  
FE related    React    Next.js    GraphQL    Redux    Redux Toolkit    Zustand  
Shopify    Dato CMS    Code Mirror    Mapbox

### Tools & Softwares

Code related    VS Code    Git    Prettier    ESLint  
Other soft    Figma    Vercel    Github    Jira    Resend    Google Page Speed
